Frogleys Offshore – 02 6681 3988

ATOMIC ARROWZ TWO PIECE RODS

Atomic Arrowz fishing rods launched in early 2017 and brought together highly advanced designs and the finest Fuji components assembled on a full-graphite blank. Designed originally as series of one piece rods, customer demand has seen the introduction of a two piece models featuring all the same high quality components.

The focus has been on the Estuary, Offshore and Bream specific models and ensuring no flat spots through the join to maintain sensitivity. The new two piece Estuary Series starts with the finesse 70SUL (2–6lb) has

four models finishing up with the 70ML (6-14lb) for heavier estuary fishing

The Offshore Series delivers superior control across four two piece seven foot spin rods. They feature ultra-refined fore and rear neoprene grips and have an excellent balance with two piece models again have seamless transition, you couldn't even tell they are 2 piece rods!

For the Bream fans range there are now two piece versions of the Bream Surface 70BS and the Bream Crank 70BC making transportation and storage easier and safer.

All Atomic Arrowz rods are balanced perfectly to deliver the ultimate feel and bite response. Refinement, precision and lightness without sacrificing strength.
