### Sabiki Rigs — S150, SS203, S523

Gamakatsu introduces three new versions of the popular Sabiki Rigs, the multi-hook tool to catch a whole school of live bait at once. Each hook is rigged with an extremely durable, high grade latex attractant that mimic small bait and prawns as the angler twitches and jerks — to tempt the most wary bait fish. They are especially hot for catching slimies and yakkas, and they are also used for herring and mullet.

Every component of the rig is top of the line, hand assembled for unmatched durability. Sabiki designed for multiple trips – these are not a disposable item.

S150: has a UV coated hook, which is a bite stimulant in deep water, as it mimics the 'glow' of plankton, prawns and squid in black ocean.

SS203: designed to naturally absorb sunshine and mimic the organic bioluminescent process and glow deep, dark water. (Think fireflies and glow worms.)

S523: fitted with a UV glow bead as an added bait-luring addition to its life-like pink shrimp jacket.

**S150 CODE – SABIKIS150 | SIZE: 3 - 9 | RRP- \$10.95**

**SS203 CODE – SABIKISS203 | SIZE: 3 – 9 | RRP- \$14.95**

**S523 CODE – SABIKIS523 | SIZE: 5 - 8 | RRP- \$10.95**
