ZERO TOLERANCE KNIVES

Zero Tolerance (ZT) is a brand of Kai USA Ltd. The brand was established in 2006. Designed from the beginning for specialised uses, the range started out with combat knives but quickly developed into general purpose and premium knives that met all of the needs of professionals in the military and law enforcement, as well as services such as fire-fighters and emergency medical personnel.

Each and every knife is built to an exacting standard. ZT combine materials such as titanium and carbon fibre with only the highest grade steel blends such as S30V, S35VN and CTS-204P. These combine steel, carbon, chromium, vanadium, molybdenum, and niobium to increase the blades toughness, hardness, response to sharpening and ability to hold an edge.

The Zero Tolerance folding knives are unbelievably smooth with a finish and feel that is second to none. The knives are 'over engineered' and with a strong and durable build. They are suitable for a wide range of uses from general outdoors to task specific activities. All are built in their Tualatin, Oregon USA manufacturing facility.

With over 14 models there is a knife for every true knife enthusiast! For a full listing please go to frogleysoffshore.com.au.
