SAMURAI PREMIUM ROD BLANKS

The raw materials for Samurai rod blanks are sourced from only high quality graphite suppliers with each batch tested to ensure it meets our standards. Each individual blank is cut, rolled and baked to a precise Samurai recipe to ensure that every blank we produce is of the best quality with an action that suits its intended purpose.

Samurai's focus is solely on creating the ultimate fishing rod blanks unequalled in technology and design and they have released a new Premium Series of task specific blanks covering travel, land based and light jigging.

Samurai is continually evolving and introducing new blanks and expanding the range available, the last 6 months have seen the largest expansion yet. Samurai now has over 70 blanks available in Australia and can now even find blanks suited to a type of fishing.

Travel

The three and four piece Travel Series Blanks have been designed from the ground up combining Samurai's technology with the convenience of a blank that can handle

being broken into lengths that still maintain a bend through the joins with no flat spots.

This ability creates a blank that is manageable, strong and sensitive. Perfect for custom builds for travelling anglers with limitations on luggage space.

Land Based

The Ledge series of blanks are built for land based lure casting and will make great land based bait fishing rods. Samurai have combined an ultra light blank tuned for land based fishing with the length to ensure its easy to handle while still providing maximum casting distance and fish fighting ability.

The light responsive blank is available in six weights covering lighter models for anglers sitting on the side of a river or estuary up to heavier models perfect for chasing tailor, salmon and mullock for the heaviest model.

SP612-2F	Samurai Premium Blank 9'6 2 Pc 20-35lb Fast
SP712-2F	Samurai Premium Blank 9'6 2 Pc 30-50lb Fast

Jigging

Samurai light jigging blanks are thin, lightweight and strong making them perfect for the high use taxing light jigging style. We have tuned our blanks to have a parabolic curve throughout the length with a soft tip to deliver the most precise lure movement required. Down low, they are still strong and have the necessary power to land large fish.

The tuned blank is available in many jig weights to cover a wide range of jigging styles and depths. The rating of the blank is the recommended jig weight, can be heavier or lighter, this is the recommended jig weight.
